

POIZON

POIZON is one of the largest marketplaces in the world

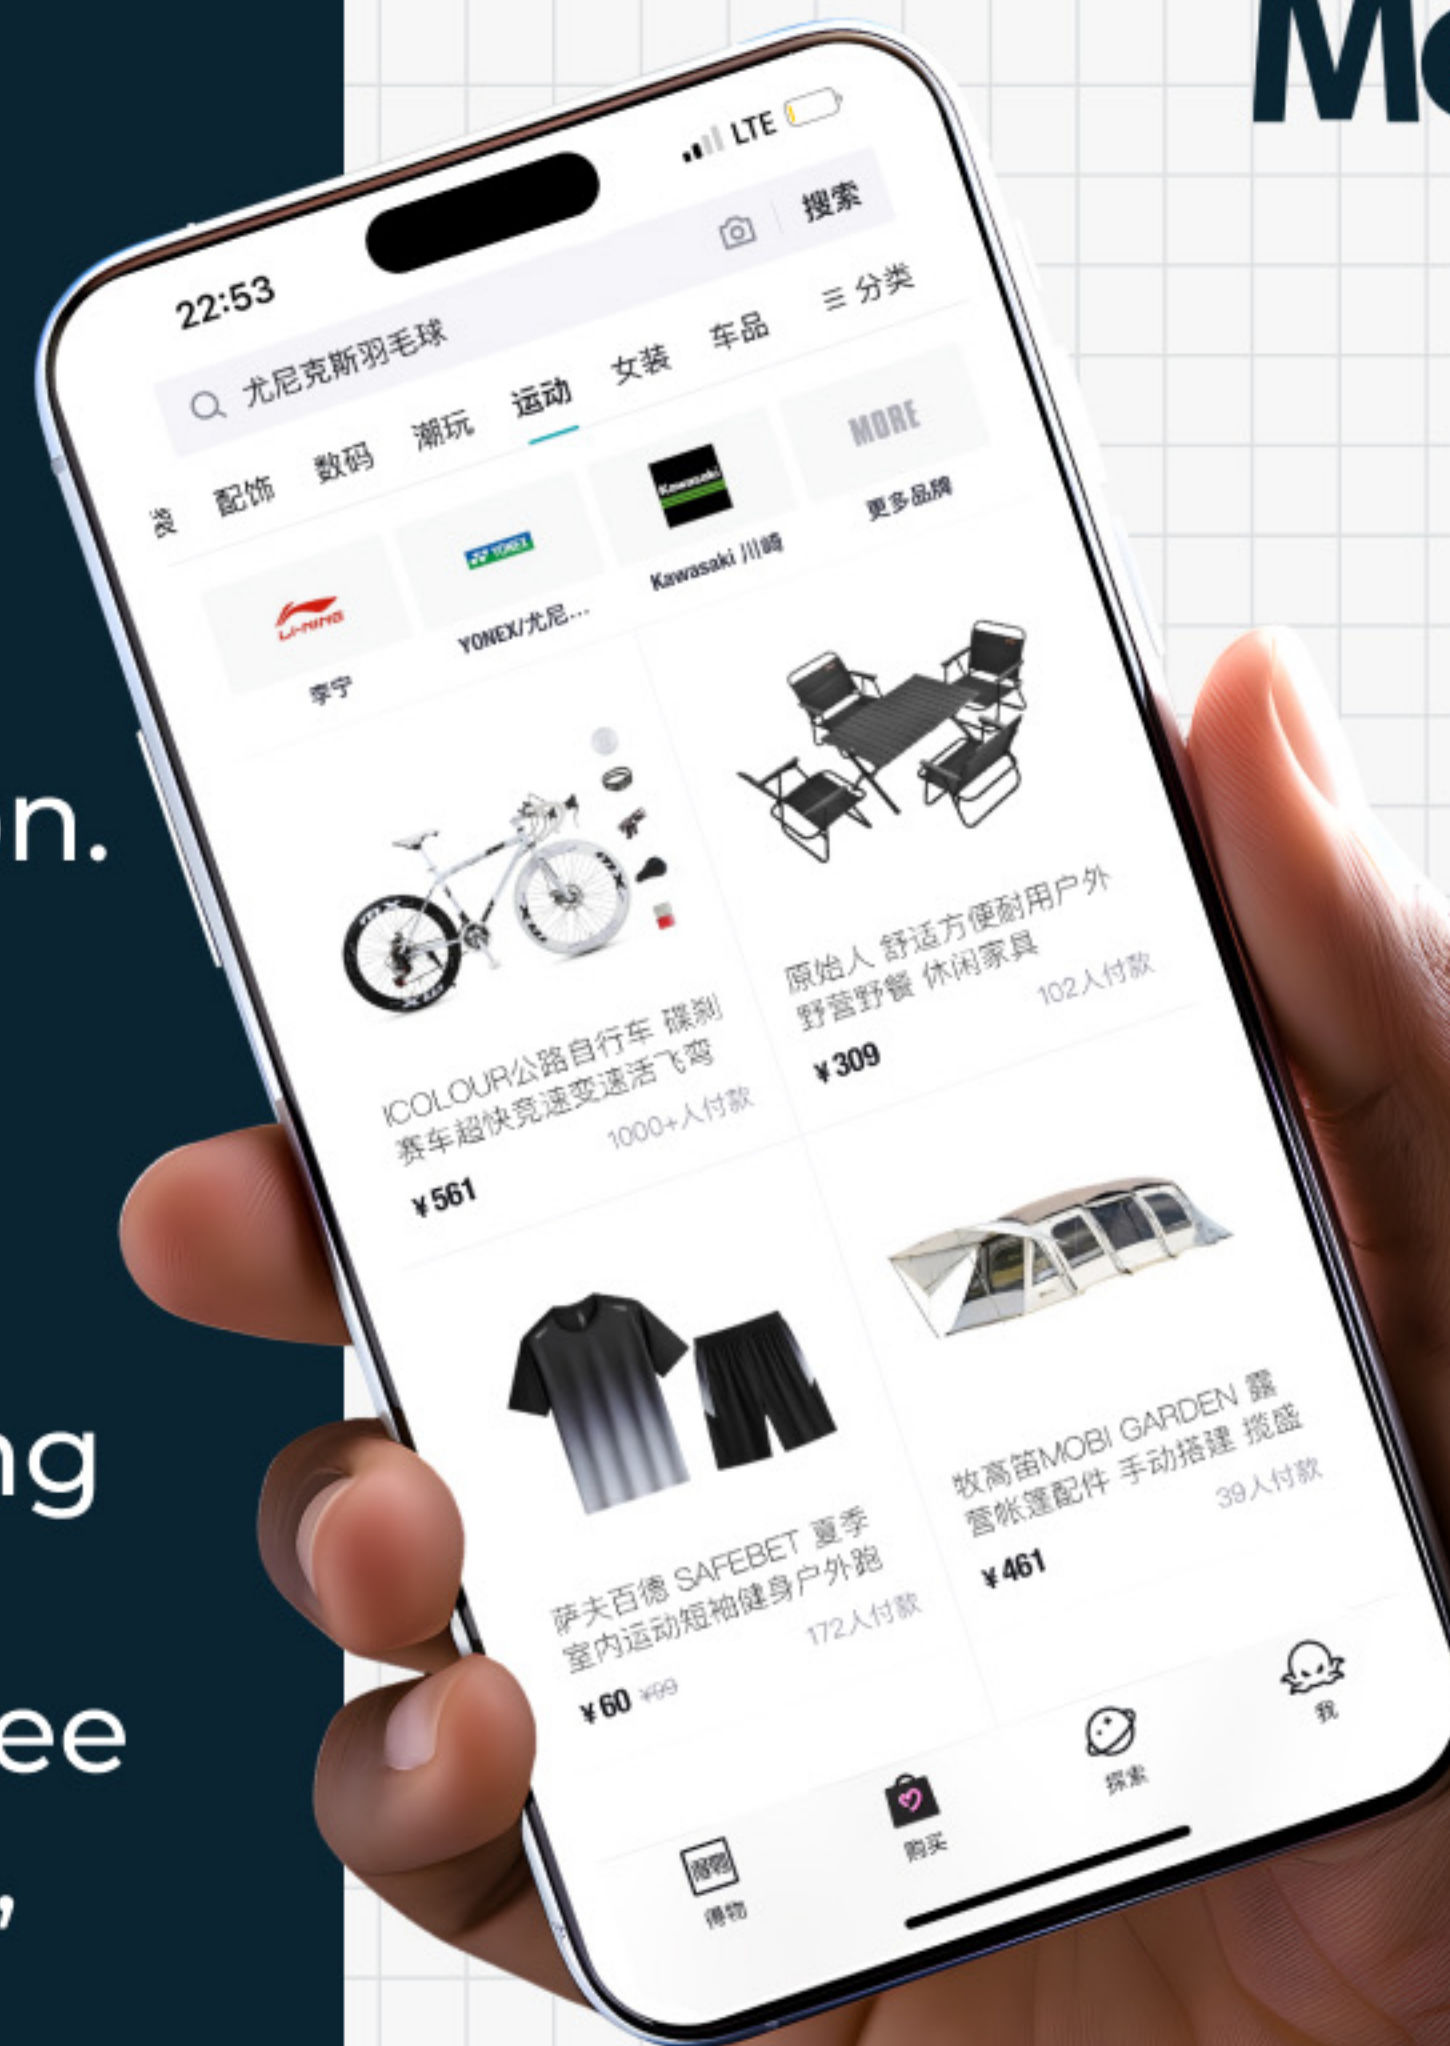

POIZON

Since its inception in 2015, POIZON has been used as a social network where users could post various content related to art and fashion. After market analysis and improvements, POIZON today is a full-fledged store where you can order absolutely all goods.

As you all know, China is famous for producing counterfeits. Even if sellers indicate the expected mark "original," there is no guarantee that it will be truly original production. Often, you can come across scammers who profit from the names of brands by passing off counterfeits as originals.

POIZON

POIZON is your indispensable assistant in buying branded products. Its creators invested considerable funds in the project to develop the best system for verifying goods for compliance with the specified brand.

The platform guarantees a 100% purchase of the original.

HOW DOES THE AUTHENTICITY CHECK WORK?

- ➔ After your payment, the ordered goods go to the marketplace specialists.
- ➔ In turn, they check everything according to the system: tags, seams, labels, insoles, prints, materials, etc.
- ➔ If the product is authentic, after verification, a POIZON tag is attached, which means 100% original goods, and a certificate of conformity is provided.
- ➔ Suppose the product is a counterfeit. POIZON guarantees to refund you three times the amount.

The temptation to receive compensation three times the amount is great, but still remember to check the reviews of stores and their products on the platform to choose the best.

HOW DOES THE AUTHENTICITY CHECK WORK?

POIZON is a unique platform that guarantees you will receive quality 100% original goods at a fair price.

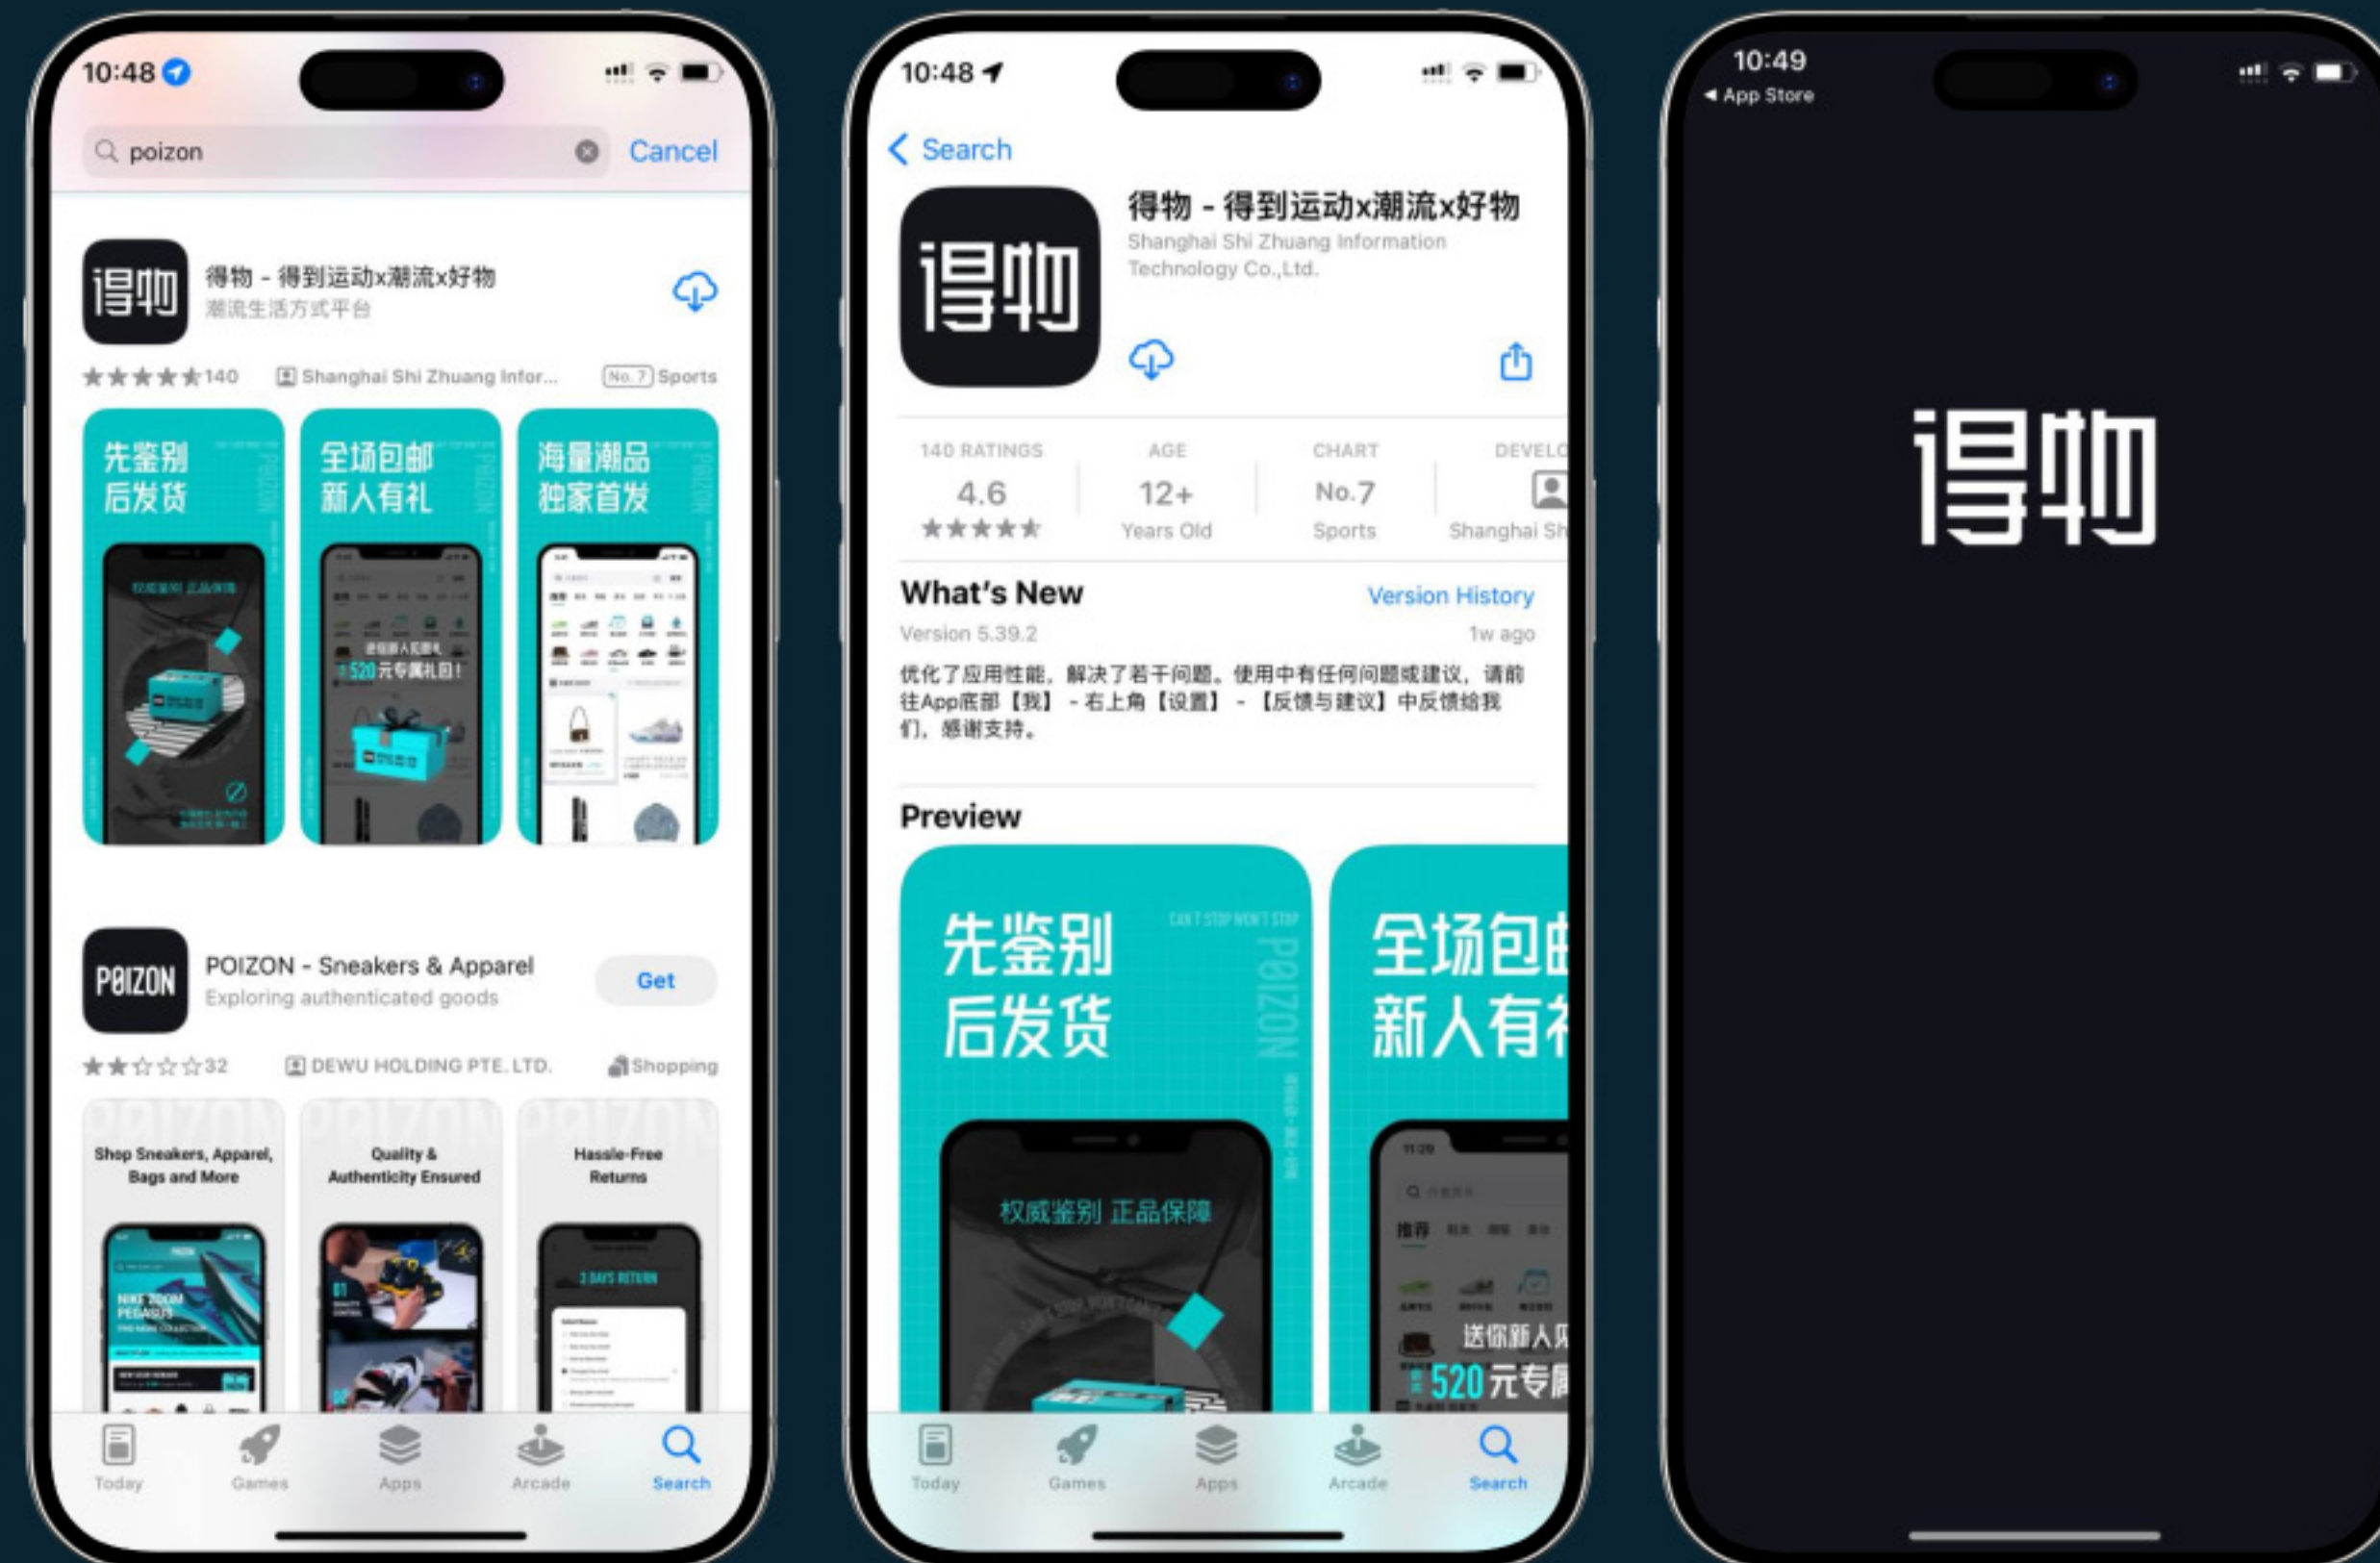

Chinese POIZON does not deliver outside of China, but with Meest China, you can get branded goods in South Africa at the best price.

THE TRACKING NUMBER is a unique code for your parcel that was sent to China. Thanks to it, warehouse staff can identify the goods and add them to the corresponding client's account.

If the track number registration is not completed, the goods are received at the warehouse and added to your account as unidentified. After that, you need to remember which goods you ordered before, and when there are several goods, this slows down the identification and delivery of parcels.
